Anna Doloman, PhD candidate, won Best Poster Award at the International Conference on Biogas Microbiology that was held at Wageningen University, The Netherlands, May 1-3, 2017. Anna presented her research on "Modeling de novo granulation of anaerobic sludge," which addresses an waste-to-energy recovery process referred to as the Uplow Anaerobic Sludge Blanket Reactor (UASB) that has been a collaboration among Utah industry (WesTech Inc.), the State of Utah Science Technology and Research (USTAR) program, and the BE and Computer Science Departments at USU. Anna's major professor is Dr. Charles Miller in the BE Department.
