Anchor QEA, an environmental science and engineering consultancy with offices nationwide, is currently accepting applications for our 2020 scholarships. We are committed to supporting graduate students pursuing careers in engineering, environmental sciences, planning and restoration, and related technical fields.

Program Details
Scholarships range from $1,000 to $10,000 and are granted based on many factors, including need, academic focus and achievement, activities and community service, and related work experience. Individual awards will be provided to each recipient's institution of higher learning to be disbursed to the student for tuition and supplies.

Beginning in 2020, Anchor QEA is committing half of all scholarship funds to Black, Indigenous, and people of color (BIPOC) students.

Eligibility Requirements
Applications are open to all U.S.-based students who are:
- A full-time graduate student or person accepted to a United States graduate school
- Pursuing a major related to Anchor QEA's areas of expertise (engineering, environmental sciences, planning and restoration, or a related technical field)

How to Apply
Visit anchorqea.com/about/scholarship-program for more details, including the program scoring rubric, and to submit an application.

Deadlines
Applications must be received by November 25, 2020. Scholarships will be awarded in January 2021.

Note: Anchor QEA also supports student development through challenging internship programs. Visit our website for details.
