June 1, 2018 — Faculty, staff and students in USU’s College of Engineering extend their congratulations to Leslie Buxton who received the USU 2018 Outstanding New Advisor award.

Buxton joined the College of Engineering in November 2016 and provides advising services for undergraduates in civil, environmental and mechanical engineering. Buxton says she enjoys both the challenges of her career and working with engineering students.

“I feel a strong sense of responsibility to my students, the College of Engineering and the larger university community to learn as much as possible so that I can be an asset to students and higher education,” she said.

Dean Adams, executive associate dean for undergraduate affairs, said Buxton is very diligent in helping students navigate and manage their engineering courses as well as assisting students with short- and long-term goals.

“She is an advisor/teacher that instills in each student the importance of lifelong learning,” he added. "I must say her workload is substantial and yet she has performed excellently and is always willing to help."
